Virtual Open Innovation
Environment for SMEs

The people:

- SME Managers in the agro-food and bio-economy sector,
- Professional development Consultants,
- VET Trainers

The institutions:

- SMEs support organisations
- VET providers
- Ministries of Development and Agricultural Development
- Associations of Chambers of Commerce
- Geotechnical Chambers
- Financial Chambers
- Public authorities in charge of agricultural development at regional and local levels
- Universities and Research institutions
- Clusters/networks

The results:

A **Virtual Open Innovation Environment** - a complex platform integrating tools for building professional open innovation competence among managers within agri-food and bioeconomy sector that will directly target the need for action oriented competence development.

The goal:

The Virtual OI Environment will incorporate 3 specific areas with opportunities for SMEs competence building:

Area 1 - Organisational Area. In a form of practical tutorial regarding open innovation strategies/methodologies for SMEs for capacitating participants to design them and implement them in their organisations,

Area 2 - Individual Development. Area focused on development of Open Innovation Competencies of Managers as individual leaders, competencies required for their ability to manage activities in the scope of open innovation.

Area 3 - Open Innovation repository. A resource base gathering already available tools and support measures for SMEs open innovation.
